

- Standard built-in drain pump with an increased reach of 1000 mm height.
- Special low noise fan design.
- Different swing angle design for cooling and heating mode for better comfort.
- Wireless remote control.
- Wall control (optional).
- Only 2 interconnecting wires.

 Optional  
 CL 98 047

**SUPER DC  
 INVERTER**

**3D** DC inverter  
 DC fan motor indoor  
 DC fan motor outdoor  
 30% efficiency increased

**2C** Comfortable  
 Convenient

**2E** Efficiency  
 Energy-saving

**8°C heating control**  
 Maintain the room temperature steadily at 8°C and prevent the room from freezing by heating operation when nobody is at home for long in severe weather.

**2 ambient sensor**  
 Indoor ambient temperature can be sensed more accurately.

**3 sleep modes**  
 Common, Default, User-defined

**Mode 1:** Indoor temperature automatically rises (when cooling) or drops (when heating).

**Mode 2:** Featuring unique function, the temperature is automatically adjusted to be a little lower before you wake up.

**Mode 3:** You could program your own sleep curve under DIY mode.

**Smart zone controller**  
 Possibility to control several units simultaneously from only one remote controller. The smart zone controller can directly control up to 16 indoor units (optional)

**7 fan speeds**  
 From Super low to Turbo, choose desired fan speed.

**Turbo Operation**  
 With this function, the air conditioner will maximize the output of cooling or heating capacity, make the room cool down or heat up rapidly, and attain the desired temperature in the shortest time.

**Low Ambient Cooling**  
 The air conditioner with a special built-in Low Ambient Kit can be used in temperature as low as -15°C for cooling and heating operation.

**Memory / Auto-restart function**  
 If the air conditioner breaks off unexpectedly due to the power cut, it will restart with the previous function setting automatically when the power resumes.

**Low temperature dehumidity**  
 It works under the dehumidification mode even if the temperature is lower than 12°C

**Filter "DustProof"**  
 Eliminate formaldehyde and other volatile organic compounds (VOCs) as well as harmful gases and odours.

**H Gate card system**  
 Available at a preset port in PCB for the gate card system to be set and connected to this port and work with this function.

**2 Wired controllers for 1 unit**  
 Wall or remote control (optional)

**0.33W Standby**  
 Intelligent on-off technology enables products automatically enter energy-saving mode when standby, cut energy consumption from normal 4-5W to 0.33W which counts 90% of Memory / Auto-restart saving.

**Timer function**  
 The timer can be set to start and stop at any point in a 24-hour period.

**Trouble shooting**  
 Error codes are displayed in the indoor panel and wall control.

**High efficiency digital PFC control**  
 1% efficiency increased

**180°C Sine wave inverter technology**  
 Energy saving
